Railcare signs strategic framework agreement with Trafikverket

Railcare have signed a framework agreement with Trafikverket with regards to the track work required throughout Sweden. The agreement period is for two years with an option to extend for another two.

The framework agreement is strategically important for Railcare as the company can optimise the utilisation of its Railvac machines throughout planned customer projects for a long period. The framework agreement also includes the preliminary work associated with the upcoming track removal work, which is included in Trafikverket's announced plans. In conjunction with the contract, Railcare look forward to receiving orders for the works being carried out during 2019.

"This framework agreement is very good for Railcare as we see large volume increases in Sweden for the next coming years. Railcare is now able to optimise our machines whilst working together with Trafikverket to implement the planned track works," says Daniel Öholm, CEO of Railcare Group AB.
